Scuba Discovery

The SCUBA Discovery program is a one-time SCUBA "Experience" that allows anyone who is interested in SCUBA diving to try it in a pool setting without initially committing to a full certification course.

Taught by an instructor, this introductory course consists of a classroom portion and the remaining time is spent in the water breathing on SCUBA equipment.

Snorkeling

Our Snorkeling Course is designed to introduce you to this fascinating world in a single session.

Our instructors will introduce you to the equipment you will need, which generally consists of a mask, snorkel and fins. Use of a snorkeling vest is also introduced.

As a Snorkeling student you will enjoy a brief introduction to snorkeling in our classroom and then enter the pool to participate in an introduction to snorkeling skills. This includes learning how to breathe, how to kick, entrance and exit from multiple scenarios, clearing your snorkel and mask and how to do a surface dive.

Review/Refresher

The SCUBA Review is designed to allow the certified diver time with a professional to review skills necessary for fun & safe diving. This review is perfect for the diver who has not been diving for over 1 year and wants to hone their skills before a trip.

You will receive a Review Logbook page, signed by the instructor, to have for your personal records and present to any dive operation on completion.

First Response

This course is cardio-pulmonary resuscitation (CPR), first aid, and automated external defibrillator (AED) use combined into one program. It is designed to teach the techniques to administer CPR, first aid, and utilize an AED in emergency situations involving infants, children, and adults.

Scuba Specialties

Advanced Buoyancy Diver – This specialty is designed to increase the open water diver's understanding of the factors that influence buoyancy and to train the diver in using those means available as methods for controlling buoyancy.

Computer Nitrox Diver – Course is designed to teach open water divers how to use Nitrox up to 40 percent with the aid of a Nitrox programmable dive computer.

Rescue Diver Course – The rescue certification course is designed to develop the knowledge and necessary skills for an individual to effectively perform diver rescues and assists, and administer necessary first aid.

Open Water Classes

Weeknight and Weekend Scuba – These are the scheduled dates for the pool sessions for the Open Water certification. The Weeknight and Weekend Scuba classes run year round.

Open Water – These are the scheduled dates for the four open water training dives to complete the Open Water certification. These are completed at a quarry in Ohio with Aquatic Adventures typically June – September.
